The Official Launch of Kingdee Cloud Galaxy MES Cloud in Tandem with the Creation of the Ecosystem Alliance for Smart Manufacturing

(13 June 2019, Hong Kong) **Kingdee International Software Group Company Limited** (“Kingdee” or the “Group”; stock code: 00268.HK) is pleased to announce that the Quality Assurance Forum on Kingdee Cloud Galaxy for the Restructuring of Manufacturers’ Value Chain and the Launch of MES Cloud was successfully concluded.

In response to the national government’s strategy of “Made in China 2025”, Kingdee Cloud Galaxy teamed up with the Ministry of Industry and Information Technology of Zhuhai, China Unicom, Huawei Cloud and Fortinet to create the “Ecosystem Alliance for Kingdee Cloud Galaxy Smart Manufacturing”. They will join their efforts in promoting industrial upgrade of enterprises in Zhuhai through the development of interconnected network created by industrial symbiosis as well as the manufacturing transformation driven by the “Smart+” strategy, thereby helping more Chinese manufacturers implementing digitalization.

Meanwhile, Kingdee Cloud Galaxy officially launched V7.3 MES Cloud for smart factories, the first domestically-developed smart manufacturing solutions incorporating PLM + ERP + MES systems. Showcasing Kingdee’s brilliant insight into the needs of Chinese enterprises gained over the past two decades, this product overcomes the limitations of pyramid IT solutions and OT architecture and is a new generation of digital network architecture based on MES Cloud platform which provides a full range of Cloud services including PaaS.

The creation of the “Ecosystem Alliance for Kingdee Cloud Galaxy Smart Manufacturing”

About MES Cloud:

While production orders become increasingly diverse, there is a pressing need for manufacturers to upgrade their production modes as they play a significant role in creating value for them and reinforcing their core competence.

The Chinese got acquainted with the manufacturing execution system (“MES”) rather late when compared with other IT systems. In contrast to ERP system, MES was developed purely for manufacturing process. It is mainly used to handle goods movement in the “people, money and goods” networking and production in the “production, procurement and marketing” networking. By integrating engineering data management system, inventories management system, production management system and quality management system, it helps managers to monitor and control the entire production process which ranges from production planning and scheduling, production process reporting to stock tracking. Therefore, they can get access to all production information and management production activities easily.

Integration of PLM + ERP + MES:

During the production process, managers can make use of product lifecycle management (“PLM”) system to merge the materials, bill of materials and production process information into ERP and MES systems. Meanwhile, MES system serves as an operational administrator and is used to manage the physical production process. ERP system serves as an operational executor and is used to support PLM and MES systems and to facilitate the interconnection of the three systems. Such integration enables managers to achieve their main goal of integrating platform, businesses and data into a single platform.

About Kingdee

Kingdee International Software Group Company Limited (“Kingdee International” or “Kingdee”) was established in 1993. It is listed on the Main Board of the Hong Kong Stock Exchange (stock code: 0268.HK) and headquartered in Shenzhen, the PRC. Adhering to the core values of “Acting in all Conscience, with Integrity and Righteousness”, the Company is committed to helping businesses achieve their growth targets and let the sun shine on every company through dedicated services. It strives to provide them with the most trusted enterprise service platform.

Through persistent efforts to explore China's Cloud enterprise service market, Kingdee has retained the largest share in the enterprise application software sector for fast-growing enterprises for 14 consecutive years, and has grasped the biggest share in the enterprise-grade SaaS Cloud services industry for the second year. In addition, Kingdee’s diverse Cloud services and products are the preferred choices of leading enterprises. They include “Kingdee Cloud Cosmic” (a Cloud service platform for large enterprises), “Kingdee Cloud Galaxy” (a digital innovative Cloud service platform for medium and large enterprises and fast-growing enterprises), “Kingdee Jingdou Cloud” (one-stop Cloud services platform for micro and small-sized enterprises), “Cloud-Hub” (intelligent Cloud office), “Guanyi Cloud” (Cloud services for E-commerce operators) , “Cargeer” (Cloud services for auto dealers) and “Wojia Cloud”(Cloud services for Property Industry). With its strengths in management software and Cloud services, Kingdee provides services and products to more than 6.8 million enterprises, government agencies and other organizations around the world.
