Looking back on the year, we continued to advance our strategic transformation toward a cloud subscription model, with revenue from cloud services increasing to 81.6%, enabling more effective reductions in carbon emissions from our corporate customers’ IT infrastructure. We also further advanced the “ALL IN AI” strategic transformation, accelerating the iteration of enterprise-grade intelligent products such as the Cosmic APP, strengthening our presence in the trusted and innovative technology ecosystem, and actively expanding into international markets. These efforts have empowered the “five world-class” growth flywheel to operate more efficiently and powerfully. Based on the core values of "Acting in all Conscience, with Integrity and Righteousness", we build our Kingdee philosophy that centers around "Customer-Centric, Long-term Adherence to Professionalism; Striver-oriented, Long-term Adherence to Pure and Visionary Mind." This philosophy is continuously refined by incorporating sustainable development concepts, stakeholder concerns, and the Group's development needs. During the reporting period, we updated and released *Kingdee Philosophy 5.0*, which further clarifies the guidelines and behavioral standards we follow in engaging with eight key stakeholders in the new development stage, including customers, employees, ecosystem (partners), shareholders, peers, the government, the environment, and the public, so as to achieve sustainable development, with the balance of interests of each stakeholder fully taken into account.

1.1.2 ESG Governance Framework

We have established a comprehensive and efficient three-tier ESG governance framework with clear responsibilities at all levels. In 2024, we further strengthened our management responsibilities in response to climate change by integrating a low-carbon transition into the core agenda of our business development.

1.1.4 重要性議題評估

為了進一步識別及評估各項ESG議題的重要性，2024年度，我們參考《GRI 3: 實質性議題》首次開展議題雙重重要性評估。本次評估從「影響重要性」和「財務重要性」兩方面分析議題重要性，通過開展利益相關方調研和內部溝通等方式分析各項ESG議題對集團財務以及經濟、社會和環境的影響，並將分析結果用於支持集團可持續發展戰略規劃、目標設定和工作改進。

1.1.4 Materiality Assessment of ESG Issues

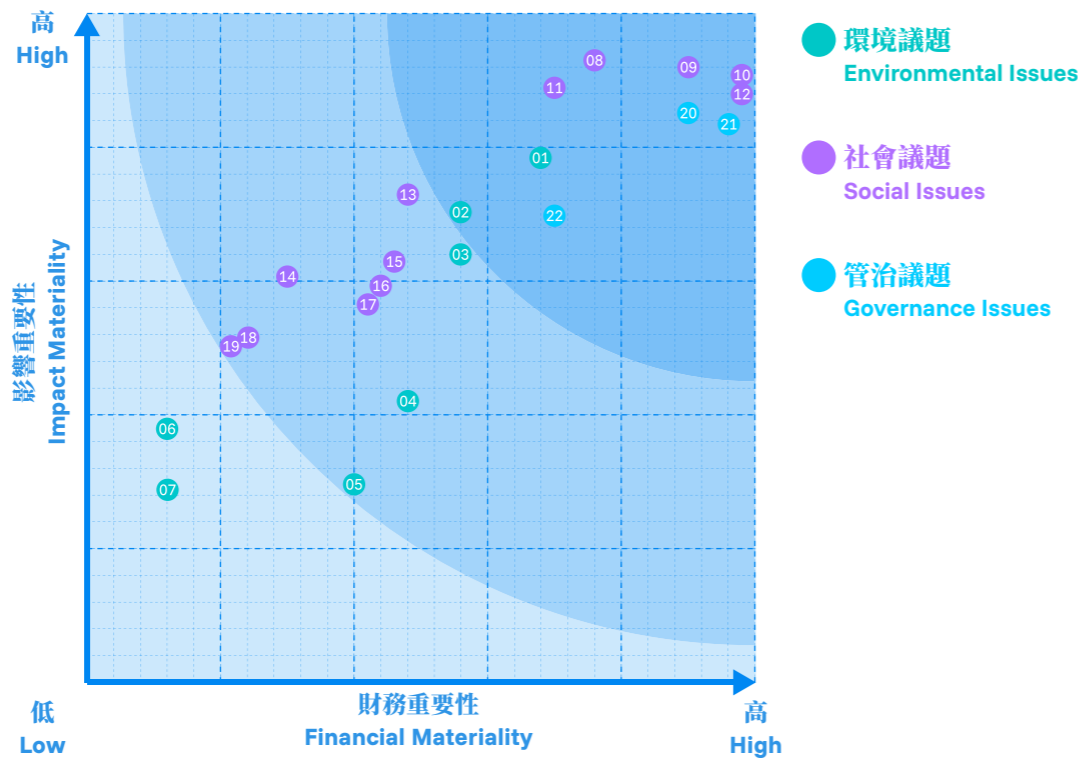

To further identify and assess the materiality of various ESG issues, we conducted our first double materiality assessment in 2024, referencing *GRI 3: Material Topics 2021*. This assessment analyzes the materiality of topics from two perspectives: Impact Materiality and Financial Materiality. Through stakeholder engagement and internal consultation, we assessed the effects of ESG issues on the Group's financial performance as well as their economic, social, and environmental impacts. The results of the assessment inform the Group's sustainable development strategy, target-setting, continuous improvement efforts.

These committees collectively form a governance structure with clear roles and responsibilities. 董事會獨立性與多元化

Independence and Diversity of the Board of Directors

我們相信獨立、多元的董事會構成能夠為金蝶帶來廣泛視角和專業見解，有助於更全面、客觀地規劃和決策集團未來的發展方向。同時，董事會成員的多元背景能將不同領域觀點和經驗匯入金蝶，為企業創新、風險管理和可持續發展提供有力支持。

We believe that an independent and diverse Board of Directors brings a wide range of perspectives and professional insights, enabling more comprehensive and objective planning and decision-making for the Group's future. A Board of Directors with diverse backgrounds can introduce views and experiences from different fields, providing strong support for innovation, risk management, and sustainable development within the group.

在董事會獨立性方面，我們已制定《獨立非執行董事的獨立要求》，其中對獨立非執行董事獨立性作出持股限制、關聯限制、利益往來限制等具體要求，以確保獨立非執行董事能獨立、公正地履行職責。

董事會績效評估

金蝶國際已建立董事會績效評估體系，每年定期開展董事會績效評估工作，從「戰略引領」「風險管控」「運作效率」「履職能力」「ESG治理」五大維度評估董事會的履職情況，確保董事會高效運作並持續提升治理水平。

2024年度，我們根據評估情況，總結以下四項持續改進措施：

(1) 優化董事會議事規則，提高會議效；(2) 加強董事 ESG 能力建設，定期組織專題培訓；(3) 完善董事會決策支持系統，提供更全面的決策依據；(4) 強化評估結果應用，將評估結果與董事任職掛鉤。

Performance Assessment of the Board of Directors

Kingdee International has established a performance assessment system for the Board of Directors, conducting regular annual assessments to evaluate the Board of Directors' performance across five key dimensions: strategic leadership, risk management, operation efficiency, competency and performance, and ESG governance. This ensures the efficient functioning of the Board of Directors and continuous enhancement of governance capability.

In 2024, based on the evaluation results, we identified four key areas for continuous improvement:

(1) Optimizing the Board of Directors meeting procedures to improve efficiency, (2) Enhancing ESG competencies of board members through regular specialized training, (3) Improving the Board of Directors' decision-support system by providing more comprehensive and data-driven decision-making references, (4) Strengthening the application of evaluation results by linking performance assessments to the board member appointments and tenure decisions.

1.2.2 投資者關係與信息披露

金蝶國際致力於通過合規、及時、透明地信息披露，加強與股東及投資者的溝通，確保投資者及時、完整、準確、平等地獲取集團信息，保障股東對集團重大事項的知情權與參與權，並確保所有股東尤其是中小股東享有平等地位。報告期內，我們開展投資者交流會議超過600場，包括70場券商投行策略會，2次高管海外路演等。

1.3 全面風險管理

健全且有效的風險管理與內部控制體系是集團穩健運營與可持續發展的重要保障。金蝶國際根據運營所在地法律法規及ISO 31000風險管理標準，制定併發布《金蝶國際風險管理聲明》，持續優化風險治理架構與管理流程，強化風險識別、評估、應對與監控，全面提升風險管理能力，推動集團穩定健康發展。

1.3.1 風險管理架構

金蝶國際建立了包括治理層、管理層和執行層的三級風險管理架構，形成了自上而下的政策指導和自下而上的風險報告機制。治理層對風險管理負最高責任，確保風險管理體系的有效性；管理層統籌風險管理工作，定期向董事會匯報工作情況並提供建議，同時指導和監督執行層工作，推動集團整體風險管理目標的實現；執行層負責風險管理的具體實施，開展各領域的風險管理活動，定期向管理層匯報並提供建議。這種多層級的架構設計確保了風險管理的全面性、系統性和有效性，實現了風險管理責任的清晰劃分和有效傳導。

1.2.2 Investor Relations and Information Disclosure

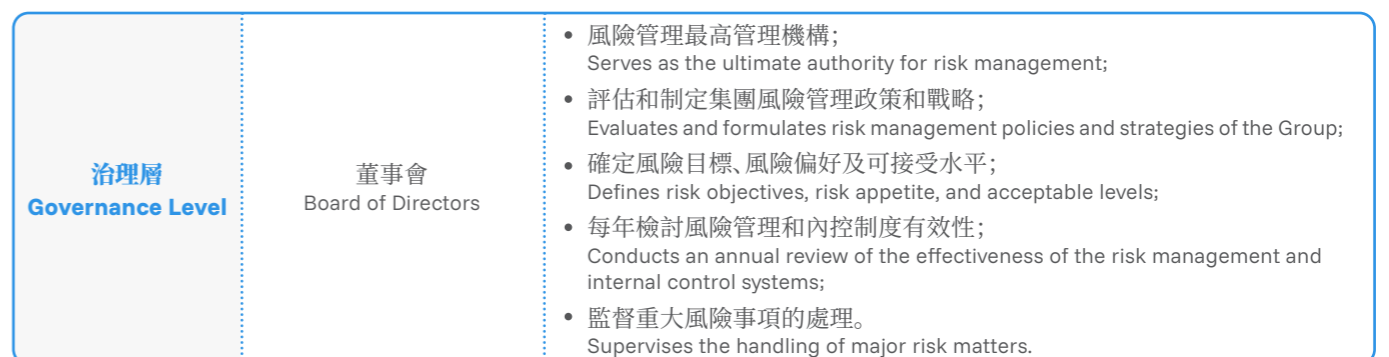

We are dedicated to strengthening communication with shareholders and investors through compliant, timely, and transparent information disclosure. This ensures that investors receive complete, accurate, and equal access to the Group's information, safeguarding shareholders' rights to be informed of and participate in major corporate matters, while ensuring that all shareholders, especially minority shareholders, are treated equally. During the reporting period, we held over 600 investor engagement meetings, including 70 brokerage and investment bank strategy conferences and two executive overseas roadshows.

Comprehensive Risk Management

A robust and effective risk management and internal control system is essential for the Group's stable operations and long-term sustainability. Kingdee International has established and published the *Kingdee International Risk Management Statement* in accordance with local laws, regulations, and the ISO 31000 Risk Management Standard. We continuously optimize our risk governance framework and management processes, strengthening risk identification, assessment, response, and monitoring to comprehensively enhance risk management capabilities and drive the Group's stable and healthy development.

1.3.1 Risk Management Structure

Kingdee International has established a three-level risk management structure consisting of the governance, management, and operation level, forming a top-down policy guidance and bottom-up risk reporting mechanism. The governance level holds ultimate responsibility for risk management, and ensures the effectiveness of the risk management system. The management level coordinates risk management efforts, regularly reports to the Board of Directors, provides strategic recommendations, guides and supervises the operational level to ensure the Group's risk management objectives are achieved. The operational level is responsible for taking specific actions to achieve risk management objectives, carrying out risk management activities in various areas, regularly reporting to the management, and providing recommendations. This multi-level structure ensures the comprehensiveness, systematic, and effectiveness of the Group's risk management approach, with clearly defined responsibilities and efficient communication across all levels.

Identification and Assessment Process of Emerging Risks

新興風險：生成式AI風險

Emerging Risk: Generative AI Risk

風險描述：可能從根本上改變SaaS軟件產品的開發和交付方式；生成式AI技術在企業的應用場景中可能存在數據與隱私安全、內容可信度、技術可控性、合規與科技倫理風險；當前監管要求尚未完善，增加了SaaS企業運營的不確定性。

Risk Description: Generative AI could fundamentally change the development and delivery of SaaS products. Its application in enterprise scenarios may pose risks related to data and privacy security, content reliability, technological controllability, compliance, and tech ethics. The current regulatory landscape remains underdeveloped, increasing operational uncertainty for SaaS enterprises.

潛在影響：傳統軟件開發模式受到沖擊，企業客戶需求和使用習慣可能發生根本性變化，SaaS提供商需快速適應新技術帶來的挑戰；若管理不當，可能引發企業敏感信息泄露、模型偏見導致決策失誤，違反知識產權和倫理問題，導致競爭力下降、運營成本上升、客戶信任流失。

Potential Impact: Traditional software development models may be disrupted, potentially leading to fundamental changes in enterprise customer demands and usage behaviors. SaaS providers must rapidly adapt to challenges brought by new technologies. Inadequate management may result in the leakage of sensitive corporate information, decision-making errors caused by algorithmic bias, violations of intellectual property and ethical issues, ultimately leading to decreased competitiveness, rising operational costs, and loss of customer trust.

應對措施：成立AI創新部門，開展前瞻性研究，並與領先AI企業建立戰略合作；探索AI治理框架，建立內部規範與審查機制；將AI功能整合到現有SaaS產品中，提升客戶價值；對員工開展科技倫理和數據與隱私保護培訓。

潛在影響：氣候信息披露要求不斷提高可能帶來合規壓力，數據中心碳排放管理和碳定價機制等可能導致運營成本上升，企業客戶對ESG管理和低碳解決方案的新需求可能改變市場競爭格局。投資者對軟件企業氣候表現的期望不斷提高。

Potential Impact: Increasing climate disclosure requirements may introduce compliance pressure. Carbon emission management and carbon pricing mechanisms for data centers could lead to higher operational costs. Shifting enterprise customer expectations around ESG management and low-carbon solutions may reshape market competition. Investors are placing greater emphasis on software companies' climate performance.

應對措施：密切關注國內外氣候相關政策法規；將氣候變化納入集團戰略考量，制定科學碳目標；推進數據中心綠色化改造，採用節能技術；開發ESG和碳管理軟件模塊，幫助客戶應對氣候變化挑戰；培養氣候相關解決方案能力。

應急管理與事件回應

金蝶國際已建立「事前預防、事中回應、事後改進」的安全應急管理與事件回應體系，最大限度降低信息安全事件⁵對客戶及自身業務帶來的影響，確保各項安全運營工作高效、規範開展。

我們成立了產品安全與應急回應團隊(Product Security Incident Response Team)，負責相關安全事件及產品安全漏洞管理。同時，我們按照數據遭到篡改、破壞、泄露或者非法獲取、非法利用，對個人、組織合法權益造成的危害程度，將數據按行業慣例從低到高分為1至5級，分別採取對應的保護措施。

在應對突發隱私與數據安全事件方面，我們發佈《金蝶雲安全應急預案》，提升突發隱私與數據安全事件的應對能力。為驗證應急預案的有效性，提升相關人員的應急能力，我們每年開展2次數據泄露應急演練，1次數據恢復演練。此外，通過對現有安全態勢的分析和評估，我們不定期開展其他類型的隱私與數據安全應急演練。報告期內，我們開展11次信息安全事件應急演練，有效防範安全風險。

為提高信息安全事件處置效率，我們制定了《安全事件應急響應》流程，涵蓋從事件發現與上報、事件處置到總結改進的全流程，確保所有事件都能在第一時間得到有效應對，最大限度地降低對業務的衝擊和對用戶的影響。

控制影響：立即啟動安全應急程序，對信息安全事件進行確認和評估，判斷泄露範圍、可能造成的影響及潛在風險，並採取措施將事件隔離，防止更多敏感信息外泄。

Impact Control: Immediately activate the security emergency response protocol to confirm and assess the incident, determine the scope of the breach, potential impacts, and associated risks, and implement containment measures to prevent further leakage of sensitive information.

根除問題：成立專項小組開展事件調查，查明泄露原因；同時對受影響的客戶和合作夥伴進行風險提示，協調開展必要的補救措施。

Problem Eradication: Form a dedicated task force to investigate the incident and identify the cause of the breach. Notify affected customers and partners of potential risks, and coordinate appropriate remedial actions.

恢復業務：啟用備份系統；修復漏洞，恢復服務。

Business Recovery: Activate backup systems, patch vulnerabilities, and restore normal operations.

⁵ 信息安全事件指任何可能破壞信息機密性、完整性或可用性的安全事故或異常行為，包括數據泄露、數據篡改、數據破壞、非法訪問、非法利用、網絡攻擊、惡意軟件感染等。
An information security incident refers to any security breach or abnormal activity that may compromise the confidentiality, integrity, or availability of information. This includes data leaks, data tampering, data destruction, unauthorized access, misuse of data, cyberattacks, and malware infections.

Emergency Management and Incident Response

Kingdee International has established a security emergency management and incident response system based on the principles of “prevention before incidents, response during incidents, and improvement after incidents”. This system is designed to minimize the impact of information security incidents⁵ on customers and business operations while ensuring that all security operations are conducted efficiently and in compliance with standards.

We have set up a Product Security Incident Response Team (PSIRT) responsible for managing security incidents and product security vulnerabilities. Additionally, based on industry best practices, we classify data into five levels (from low to high) according to the severity of harm caused to individuals or organizations due to data tampering, destruction, leakage, unauthorized access, or misuse, and implement corresponding protective measures for each level.

To improve our ability to respond to privacy and data security emergencies, we have issued the *Kingdee Cloud Security Emergency Response Plan* to strengthen our preparedness and handling capabilities. To verify the effectiveness of this plan and improve the emergency response capabilities of relevant personnel, we conduct two data breach emergency drills and one data recovery drill annually. Furthermore, based on the ongoing analysis and assessment of current security conditions, we conduct additional emergency drills as needed to address various types of privacy and data security risks. During the reporting period, we conducted 11 information security emergency drills, effectively mitigating security risks.

To improve the efficiency and effectiveness of information security incident handling, we have formulated the *Security Incident Emergency Response* process, which covers the entire lifecycle of an incident—identification and reporting, to resolution and post-incident review—ensuring timely and effective response, minimizing impact on business operations and users.

數據安全與隱私保護培訓

我們定期面向全體員工(包括兼職人員)開展數據安全與隱私保護培訓，持續提升員工在保護隱私與數據安全方面的意識和能力。報告期內，我們組織員工開展《網絡安全與數據合規》《產品安全漏洞風險暨生命週期管理》培訓，涵蓋全生命週期數據安全與隱私保護、信息安全事件回應流程及日常操作規範等內容，累計覆蓋350人，累計學習總時長700小時。

合作夥伴數據與隱私安全管理

我們將隱私與數據安全保護要求延伸至合作夥伴，要求合作夥伴、供應商簽署《金蝶數據安全承諾書》。合作商不得以任何直接或間接方式向第三方透露在合作期間獲得或知曉的金蝶及其關聯公司的任何數據和保密信息；未經金蝶或數據主體明確授權，不得緩存、竊取、泄露、濫用、非法向他人提供個人數據，不得對保密信息進行加工後還原成原始數據。相關服務涉及向金蝶提供或共享數據的，服務單位承諾數據來源合法合規，且在數據對外共享行為獲得相關數據權益方(包括數據主體)充分、合法授權的情況下方可進行相關操作。

我們每年對供應商與合作夥伴隱私數據安全管理遵守情況進行評估，確保合規。

網絡安全防護

金蝶國際嚴格遵守《中華人民共和國網絡安全法》等法律法規，按照國際通用的網絡安全管理體系標準建立完善的網絡安全管理體系，制定《金蝶互聯網安全運維管理辦法》《金蝶員工信息安全手冊》《金蝶IT資產管理辦法》等系列制度，確保網絡安全相關工作有序、高效開展。報告期內，我們對《金蝶IT資產管理辦法》進行修訂，規範集團IT資產運維管理過程，建立集團統一的IT資產運維管理體系，全面提升IT資產使用安全及使用效益。

Data Security and Privacy Protection Training

We regularly conduct data security and privacy protection training for all employees (including part-time employees) to continuously enhance awareness and capabilities in protecting privacy and data security. During the reporting period, we conducted training sessions on the *Cybersecurity and Data Compliance* and the *Product Security Vulnerability Risks and Lifecycle Management*, covering topics such as full-lifecycle data security and privacy protection, information security incident response processes, and daily operational guidelines. A total of 350 employees participated, with a cumulative learning time of 700 hours.

Partner Data and Privacy Security Management

We extend privacy and data security protection requirements to our partners by requiring them to sign the *Kingdee Data Security Commitment*. Partners and suppliers must not, under any circumstances, directly or indirectly disclose any data or confidential information of Kingdee and its affiliates obtained during the partnership to third parties. Without explicit authorization from Kingdee or the data subject, partners must not cache, steal, leak, misuse, or illegally provide personal data to others or process confidential information in a way that restores it to its original form. For services that involve data provision or sharing with Kingdee, the service provider must ensure that data sources are legal compliant. Data sharing with external parties must only be carried out with the full and legally authorization of the relevant data rights holders, including the data subjects.

We conduct annual assessments of our suppliers' and partners' compliance with privacy and data security requirements to ensure ongoing regulatory adherence.

Cybersecurity Protection

Kingdee International strictly complies with the *Cybersecurity Law of the People's Republic of China* and other relevant laws and regulations. We have established a comprehensive cybersecurity management system based on internationally recognized cybersecurity standards, formulating a series of policies such as the *Kingdee Management Measures for Internet Security Operation and Maintenance*, the *Information Security Manual for Kingdee's Employees*, and the *Kingdee IT Asset Management Measures* to ensure that cybersecurity-related operations are conducted in an orderly and efficient manner. During the reporting period, we revised the *Kingdee IT Asset Management Measures* to standardize IT asset operations and maintenance across the Group. The revised policy established a unified IT asset management system across the Group, significantly enhancing both the security and operational efficiency of IT asset usage.

供應商ESG管理

金蝶國際針對供應商實行分類分級管理，我們在供應商准入、績效評估等方面對供應商ESG管理和實踐進行動態跟蹤和管控。

本集團根據「對集團的重要性」和「市場環境」將供應商分為重要供應商、標準供應商、零星供應商、臨時供應商四類，針對不同類別供應商實施相應的管理策略。2024年，本集團共有供應商1,183家⁶，其中重要供應商共149家。

Supplier ESG Management

Kingdee International adopts a classified and tiered supplier management approach, dynamically tracking and monitoring supplier ESG practices across the entire lifecycle—from admission and performance evaluation to ongoing supervision.

Based on “strategic importance to the Group” and “market conditions”, the Group categorizes suppliers into four types: significant suppliers, standard suppliers, occasional suppliers, and temporary suppliers, implementing tailored management strategies for each category. In 2024, the Group had a total of 1,183 suppliers⁶, including 149 significant suppliers.

⁶ 供應商數量指截至2024年12月31日，與本集團保持合作關係的供應商。
The number of suppliers refers to those who maintained a cooperative relationship with the Group as of December 31, 2024.

供應商准入

金蝶國際設立了明確的供應商選擇標準，在准入階段，我們將對供應商運營情況與可持續性進行審核，審核通過後才能成為金蝶供應商。所有供應商必須簽署供應商准入資料、供應商註冊及准入協議，其中內容包含《供應商CSR行為準則》《陽光合作承諾書》《保密承諾書》《利益衝突調查表》等。截至報告期末，合作供應商《供應商CSR行為準則》或相關準則、《陽光合作承諾書》簽署率達100%。

Supplier Admission

Kingdee International has established clear and rigorous criteria for supplier selection. During the admission phase, we assess suppliers' operational status and sustainability performance, and only those who pass the review may be formally onboarded as Kingdee suppliers. All suppliers are required to sign the Supplier Admission Documents and the Supplier Registration and Admission Agreement, which include the *Kingdee CSR Code of Conduct for Suppliers*, the *Letter of Commitment to Anti-Corruption Cooperation*, the *Confidentiality Commitment*, and the *Conflict of Interest Disclosure Form*. As of the end of the reporting period, the signing rate for *CSR Code of Conduct for Suppliers* or equivalent guidelines and the *Letter of Commitment to Anti-Corruption Cooperation* among cooperating suppliers reached 100%.

截至報告期末 As of the end of the reporting period	供應商總數： Total number of suppliers:	1,183	簽署《供應商CSR行為準則》 或相關準則的供應商比例： Proportion of suppliers who have signed the <i>CSR Code of Conduct for Suppliers</i> or relevant guidelines:	100%
	重要供應商數量： Number of significant suppliers:	149	簽署《陽光合作承諾書》 的供應商比例： Proportion of suppliers who have signed the <i>Letter of Commitment to Anti-Corruption Cooperation</i> :	100%

持續ESG風險監控

我們對供應商日常ESG表現進行監控，將供應商在ESG方面出現的重大事件記錄到《供應商異常事件記錄》表中，嚴重程度影響其最終年度考核績效成績；對於違反《陽光合作承諾書》《金蝶供應商CSR行為準則》等協議的供應商給予凍結處罰，直至整改完畢且凍結期滿1年後方可重新申請成為新供應商。

Ongoing ESG Risk Monitoring

We conduct regular monitoring of suppliers' ESG performance and systematically recorded significant ESG-related incidents in the *Supplier Incident Log*. The severity of these incidents impacts the supplier's annual performance evaluation. Suppliers who violate the *Letter of Commitment to Anti-Corruption Cooperation* or the *Kingdee CSR Code of Conduct for Suppliers* are subject to account suspension. Reinstatement is only considered after the supplier has completed all necessary corrective actions, and only after a one-year suspension period has passed. Reapplication is then treated as a new supplier admission process.

供應商績效評估

金蝶每年對合作的重要及標準供應商進行年度績效評估，評估項包括質量、服務、交期、成本和綜合實力因素，以及一票否決的黑名單項。評估結果作為持續合作的參考。

Supplier Performance Evaluation

Kingdee conducts annual performance evaluations for significant and standard suppliers, assessing quality, service, delivery punctuality, cost, and overall business strength. A blacklist mechanism is also in place, serving as a veto factor for suppliers with serious violations. Evaluation outcomes are used as key references for decisions on future collaboration.

金蝶每年度會從參與績效評估的供應商中遴選出優秀供應商，並頒發獎項。通過這種方式，發揮金蝶品牌的影響力，不僅表彰在ESG實踐上表現優秀的供應商，也激勵整個供應鏈持續改善。

Each year, Kingdee selects outstanding suppliers from those participating in the performance evaluation and presents awards. Through this initiative, Kingdee leverages its brand influence not only to recognize suppliers who have performed outstandingly in ESG practices but also to foster a culture of continuous improvement and encourage ESG advancement throughout the supply chain.

供應商培訓與溝通

金蝶國際通過生態合作夥伴大會、日常合作交流、郵件等渠道與供應商保持緊密溝通，確保《金蝶供應商CSR行為準則》等要求有效傳達。我們不定期面向供應商開展商業道德、數據合規、信息安全與隱私保護等方面的培訓與宣貫，與供應商交流經驗，推動供應商可持續發展管理能力的持續提升。

綠色採購

金蝶國際將綠色、低碳理念融入日常行政物料、雲服務、IT設備以及空調、馬桶等用水用能設備採購過程中，期望通過綠色採購實踐將環保理念傳遞給上游供應商，從而推動整個產業鏈的綠色低碳升級。

行政物料：優先購買可再生打印紙、可再生衛生紙；採購辦公桌椅時，將供應商環保資質、證書作為准入條件，辦公桌椅等必須達到國標E0級別環保要求。

雲服務：在價格、功能、性能、服務支持等指標滿足要求的基礎上，將單位算力能耗、碳排放等指標納入考慮。

IT設備：結合項目情況綜合考察產品是否具備一個或多個環保認證：CECP（中國節能產品認證中心）、EPEAT金牌（電子產品環境影響評估）、Energy Star（美國節能認證）、TCO（生態、能源、輻射以及人體工學認證）、80Plus（能源轉換效率超過80%的電源）、RoHS（歐盟環保認證）。

空調、空壓機等用能設備：將能源節約程度作為參考標準。

馬桶、水龍頭等用水設備：以水效作為採購決策標準，優先購買含有水效標識和水效等級高的部件和設備。

水資源：在可行情況下，購買中水用作景觀植物養護。北京園區與第三方合作，購買達標中水並鋪設微噴管道進行綠植養護，減少新鮮水的使用。

Supplier Training and Communication

Kingdee International maintains close communication with suppliers through ecosystem partner conferences, routine collaborations, and email correspondence to ensure the effective dissemination of the *Kingdee CSR Code of Conduct for Suppliers*. We conduct irregular training sessions on business ethics, data compliance, information security, and privacy protection, sharing best practices with suppliers to enhance their sustainable management capabilities.

Green Procurement

Kingdee International integrates green and low-carbon concepts into the procurement of administrative materials, cloud services, IT equipment, and energy- and water-consuming devices such as air conditioners, toilets, etc. Through green procurement practices, we aim to embed environmental responsibility across our supply chain, driving a greener and low-carbon transformation of the entire industry chain.

Administrative Materials: Priority is given to environmentally friendly products such as recycled printing paper and toilet paper. For office furniture, suppliers must meet environmental certification requirements, and products must comply with China's E0-level environmental standards.

Cloud Services: Beyond price, functionality, performance, and service support, evaluation also considers sustainability metrics such as energy consumption per computing unit and carbon emissions.

IT Equipment: Products are assessed based on one or more environmental certifications, including CECP (China Energy Conservation Product Certification Center), EPEAT Gold (Electronic Product Environmental Impact Assessment Tool), Energy Star (U.S. Energy Efficiency Certification), TCO (Ecological, Energy, Radiation, and Ergonomic Certification), 80Plus (Power Supplies with Energy Conversion Efficiency Exceeding 80%), and RoHS (EU Restriction of Hazardous Substances in Electrical and Electronic Equipment).

Energy-Consuming Equipment: Energy efficiency is a key selection criterion.

Water-Consuming Equipment: Water efficiency labels and performance ratings are prioritized to guide procurement decisions.

Water Resources: Where feasible, purchase recycled water for landscape irrigation. Kingdee Beijing campus collaborates with a third party to source compliant recycled water and has installed micro-sprinkler systems to reduce fresh water consumption.

2.5.3 推動冶金行業循環經濟轉型

廢鋼作為一種可無限循環利用的綠色再生資源，是唯一可替代鐵礦石的煉鋼原材料，提升廢鋼在鋼鐵冶煉中的比例，提倡電爐短流程煉鋼，對鋼鐵行業實現碳達峰、碳中和有積極重要的意義，使用廢鋼逐步替代鐵礦石是國家實現雙碳目標的重要手段之一。報告期內，我們發佈「金蝶雲EBC 全流程廢鋼管理解決方案」，為鋼鐵企業打造基於全流程數據的整體解決方案。

2.5.3 Driving Circular Economy Transformation in the Metallurgy Industry

As a green renewable resource that can be infinitely recycled, scrap steel is the only alternative raw material to iron ore in steelmaking. Increasing the proportion of scrap steel in steel production and promoting electric arc furnace (EAF) short-process steelmaking plays a critical role in achieving carbon peaking and carbon neutrality in the steel industry. Substituting iron ore with scrap steel is a key national strategy for meeting dual-carbon goals. During the reporting period, Kingdee launched the “Kingdee Cloud EBC Full-Process Scrap Steel Management Solution”, providing an end-to-end data-driven solution for steel enterprises.

本集團定期面向全體員工(包括正式員工和外包員工)開展人才盤點工作。報告期內，通過線上人才盤點及規劃，極大地提升了人才盤點的效率與精準度。基於人才盤點結果，為員工精準打上產品線、業務領域、行業和客戶規模等多維度標籤，不僅為基於產品線的業績核算提供了有力的數據支撐，還有助於精準規劃員工的職業發展路徑。通過人才盤點，集團成功規劃了2,000餘人進入年度職級晉升計劃，同時有2,000餘人被納入後備人才池，構建起幹部後備梯隊，為集團的長遠發展儲備了充足的人才資源。

基於人才盤點的成果，集團建立了後備幹部人才池，後續培養過程中會開展專項培養計劃，識別出高潛人才。每年從中選拔進行繼續培養，為集團輸送管理人才，建立人才梯隊。

Talent Reserve System

Kingdee International leverages digital tools to establish a comprehensive talent assessment and reserve system, providing strong talent support for the group's long-term development.

The Group conducts regular talent assessments for all employees, including full-time and outsourced staff. During the reporting period, online talent assessments and planning significantly improved efficiency and accuracy. Based on assessment results, employees were tagged with multi-dimensional attributes, such as product line, business domain, industry, and customer scale. This not only supports data-driven performance evaluations based on product lines but also enables precise career planning. Through talent assessment initiatives, the Group successfully planned over 2,000 employees for the annual promotion program and included over 2,000 employees in the talent reserve pool, establishing a leadership succession pipeline to ensure a strong talent base for the company's long-term growth.

Based on the results of talent assessments, Kingdee has established a leadership talent pool. During the subsequent development process, specialized training programs are implemented to identify high-potential talent. Each year, the Group selects top-performing individuals from this pool for further development, funneling them into the Aspiration Program, a high-intensity leadership development initiative, to build a strong leadership pipeline for the group.

Career Development Pathways

Kingdee International has established a dual-track promotion system with “management channel” and “professional channel”, offering employees and leaders expansive career growth opportunities. All employees and managers hold professional positions and professional ranks, while managers additionally hold management ranks, thereby giving them dual labels—both professional and managerial.

Employees can achieve vertical promotion within their current positions by accumulating achievements and contributions and actively participating in rank certification, enabling them to advance to higher levels and reach new career heights. Additionally, employees can leverage the job rotation mechanism to switch between position sequences, job families, or lateral roles, enabling horizontal mobility. This lateral movement not only brings employees closer to customer scenarios but also broadens their career scope and business exposure, paving new pathways for professional development.

For employees who are interested in management roles and demonstrate leadership potential, Kingdee has established a talent reserve pool. Employees can enter this pool and apply for managerial roles, successfully transitioning from the professional track to the management track and beginning their

內部人才市場建設

金蝶國際高度重視員工的個性發展，秉持開放包容的態度，制定並實施了《金蝶輪崗管理辦法》，為績優員工搭建了內部輪崗的廣闊平台。這一機制旨在拓寬員工的職業發展半徑，培養具備多領域知識與技能的複合型人才，充分激發人才的創新活力與潛力。

本集團打造「活水平台」，構建一站式內部人才供求信息化平台。該平台致力於激活員工、幫助員工發揮更大價值，助力他們在集團內精準匹配到更契合自身發展需求與職業規劃的機會。同時，通過深度挖掘和盤活對集團產品有深刻理解和豐富經驗的內部人才資源，實現人才資源的優化配置與高效利用。

本集團積極鼓勵員工通過輪崗，深入體驗、熟悉不同崗位的工作內容，借此全面提升個人綜合能力。我們重點鼓勵員工從研發崗位向一線崗位輪崗、從中後臺崗位向一線崗位輪崗，以及前往艱苦地區輪崗、開展跨職能輪崗等。通過這些輪崗方式，員工能夠實現跨序列、跨職位、跨地域的橫向流動發展，積累豐富的實踐經驗，為個人職業發展注入強大動力。

Internal Talent Market Development

Kingdee International values individual career growth, fostering an open and inclusive approach by implementing the *Kingdee Job Rotation Management Measures*, providing high-performing employees with extensive internal mobility opportunities. This mechanism aims to broaden employees' career horizons, cultivate multi-disciplinary talent, and unleash innovation and potential.

The Group has launched the “Living Water Platform”, a one-stop digital platform for internal talent supply and demand. This platform empowers employees by helping them maximize their value and find internal career opportunities that align with their aspirations and growth plans. Additionally, it enables the Group to leverage internal talent with deep product knowledge and rich experience, ensuring the optimal allocation and efficient utilization of resources.

We actively encourage employees to engage in job rotations, allowing them to experience and familiarize themselves with different roles, thereby enhancing their overall capabilities. Employees are particularly encouraged to rotate from R&D roles to frontline positions, from back-office positions to frontline positions, and to undertake challenging regional assignments or cross-functional rotations. These opportunities facilitate cross-sequence, cross-position, and cross-region career development, allowing employees to gain valuable hands-on experience and driving significant momentum in their career advancement.

Remuneration Management

Kingdee International regularly conducts external market salary surveys through third-party organizations, ensuring precise salary comparisons across regions, industries, and equivalent job roles. These benchmarks serve as the basis for salary adjustments, ensuring that Kingdee's compensation remains competitive within the industry. Additionally, we have established a digitalized, comprehensive employee salary database and an integrated salary management system. During the reporting period, in line with the Kingdee Philosophy of "position-based grading, grade-based compensation, and flexible adjustment," we developed a compensation-contribution matching model, continuously ensuring healthy employee flow across recruitment, development, deployment, and retention. We have optimized the *Compensation Management Guidelines* and the *Compensation Operation Manual*, and issued the *Kingdee Compensation Calculation and Distribution Management Guidelines* to further standardize the salary calculation and distribution process, improve the salary calculation and distribution workflow, and ensure the safety, compliance, accuracy, and efficiency of salary calculations and distributions.

Kingdee International continues to advance performance management standardization, integrating job qualification standards into all aspects of performance evaluation while conducting regular performance training to improve managerial efficiency and communication skills. During the reporting period, we benchmarked industry best practices and optimized performance goal setting and management under the *Kingdee Performance Management Measures (2024)*, further refining an evaluation system based on accountability and contribution. We also implemented ongoing employee performance coaching and personalized improvement plans, while enhancing the performance appeal process to ensure fairness, objectivity, and transparency in evaluations, continuously improving the performance management framework.

Based on these insights, we implemented a quarterly OKR goal management mechanism for all executives, ensuring clear objectives and key results that align with corporate strategy and operational goals.

- 優化組織KPI與個人KPI。強化全員損益和擔當意識，按責任中心（利潤中心、投資中心、費用中心），從規模（收款和收入）、盈利（利潤和費用）兩個維度設置組織關鍵績效指標。同時，聚焦個人價值創造，根據職位指標庫、部門關鍵任務、角色關鍵任務設置個人關鍵績效指標。

- Optimizing Organizational & Individual KPI Management: We reinforced profit and accountability awareness across all employees. Key organizational KPIs were established based on responsibility centers (Profit Centers, Investment Centers, Expense Centers), with a dual focus on scale (collections and revenue) and profitability (profit and expenses). Individual KPIs are reviewed weekly, monthly, and quarterly, with a focus on evaluating whether an employee's independent contributions align with their job responsibilities and the contribution requirements of their role and level. Employees who meet or exceed expectations are recognized and encouraged to aim for higher goals, while those who fall short receive managerial support in reflection, performance improvement planning, coaching, and skill development to help them enhance their job competency and achieve their personal KPIs.

Addressing Climate Change

Kingdee International actively responds to the international “carbon peaking and carbon neutrality” goals and places high importance on the identification, assessment, and management of climate-related risks and opportunities. We have incorporated climate risks and opportunities into the Group’s overall risk management system. During the reporting period, we managed and disclosed climate-related impacts with reference to the *Recommendations of the Task Force on Climate-related Financial Disclosures (TCFD)* and the *Implementation Guidance for Climate Disclosures under HKEX ESG reporting framework* by the HKEX.

4.2.1 Governance

Kingdee International has established a top-down climate governance system, integrating climate change management functions into the environmental management structure¹⁰. The Board of Directors, as the highest decision-making and oversight body, is responsible for reviewing and overseeing the formulation and implementation of climate strategies, integrating climate considerations into major strategic decisions. The Board convenes annually to review progress on climate strategy development and implementation, and to evaluate the identification and assessment results of climate-related risks and opportunities for the year. The Strategy and Sustainable Development

本集團充分參考氣候相關財務信息披露工作組（TCFD）建議，利用情景分析方式識別并評估各項氣候相關風險和機遇在不同情境下對集團業務運營和財務績效的潛在影響，并將結果納入氣候戰略與應對舉措考量。

Committee of the Board of Directors is responsible for formulating climate-related strategies and targets, assessing climate risks and opportunities, and monitoring the effectiveness of climate change risk management and response initiatives. The Committee holds semi-annual meetings to review climate risk and opportunity assessments, track progress on climate-related targets, and evaluate key decisions related to climate opportunities.

The Strategy and Sustainable Development Committee is chaired by Mr. Xu Shaochun, Chairman and CEO of the Group. The Committee members possess diverse professional backgrounds in computer science, accounting and finance, and corporate management, and have extensive experience across software services, manufacturing, and financial industries. One of the non-executive directors previously served as the first rotating chair of the “Sustainable Development Committee” of the United Nations Development Programme (UNDP) and has strong expertise in managing sustainable development affairs. Their diverse professional backgrounds and practical experience enable the Committee to comprehensively assess climate-related risks and opportunities from a strategic perspective, formulate science-based carbon reduction targets, and effectively oversee implementation. Moreover, their expertise in technological innovation also provides strong support for the Group in leveraging advanced technologies in addressing climate challenges. In addition, all Board member and executives receive regular climate-related training annually. The Group also invites external experts to share insights from time to time to ensure our team stays informed of the latest climate trends and continuously improves its climate management capabilities.

We have established an Environmental and Climate Change Task Force, composed of management from relevant departments, responsible for executing climate strategies and targets set by the decision-making level. The Task Force plans roadmaps and actionable plans to achieve these targets, implements various mitigation and adaptation measures, and integrates climate management into daily operations. Key climate-related indicators are also incorporated into the performance assessment system for management, and the achievement of climate targets is one of the performance assessment criteria, to ensure the effective achievement of climate targets.

4.2.2 Strategy

Kingdee International understands that climate change poses both risks and opportunities to our operations and business. We regularly conduct climate-related risk and opportunity identification and assessment. We sort out the possible risks and opportunities we may face, analyzing their potential impacts on our business and financial performance. Based on the results, we develop corresponding response strategies.

The Group fully references the *Recommendations of the Task Force on Climate-related Financial Disclosures (TCFD)* and adopts scenario analysis to assess the potential impact of various climate-related risks and opportunities on the Group’s business operations and financial performance under different

During the reporting period, we conducted climate scenario analysis for our major office locations and data centers. We referred to the *Sixth Assessment Report (AR6)* released by the Intergovernmental Panel on Climate Change (IPCC) and selected Low-emission Scenario (SSP1-2.6) and High-emission Scenario (SSP5-5.8) from the Shared Socioeconomic Pathways (SSP) to assess the impact of physical risks such as typhoons, extreme precipitation, and extreme heat. Additionally, we referred to the *World Energy Outlook 2024 (WEO 2024)* by International Energy Agency (IEA) and selected the Net-Zero Emissions by 2050 Scenario (NZE Scenario) and the Stated Policies Scenario (STEPS) to assess transition risks, including policy and legal risks, and technological risks. The time horizons for the scenario analysis covered Short term (1-3 years, from 2024 to 2026), Medium term (3-7 years, from 2026 to 2030), and Long term (7-30 years, from 2030 to 2053).

物理風險評估情況

我們根據IPCC AR6所使用的第六次國際耦合模式比較計劃 (CMIP6) 全球未來情景逐月氣象數據集數據評估運營點災害發生的可能性和嚴重性。根據情景分析結果，在低排放情景下，集團因物理風險導致損失的程度較低。在高排放情景下，集團需關注華南、華東等地區運營點的颱風及極端降水風險，并關注數據中心所在地的高溫天氣風險。

轉型風險評估情況

我們根據IEA《2024 世界能源展望》、國家氣候戰略與政策、運營點氣候政策與要求，結合集團戰略規劃與現狀，評估轉型風險中「政策與法律風險」和「技術風險」的影響程度。根據情景分析結果，在既定政策情景下，集團因轉型風險導致損失的程度較低。在2050年淨零排放情景下，集團需關注碳定價、低碳技術可能帶來的成本增加。

Physical Risk Assessment

We assessed the likelihood and severity of disasters at operational sites based on the monthly meteorological dataset from the Coupled Model Intercomparison Project Phase 6 (CMIP6), as adopted in the IPCC's Sixth Assessment Report (AR6). According to scenario analysis results, under the Low-emission Scenario, the extent of losses due to physical risks is relatively low for the Group. In the High-emission Scenario, the Group needs to closely monitor the risk of typhoon and extreme precipitation at operational sites in South China and East China, and pay attention to the risk of extreme heat at the locations of data centers.

Transition Risk Assessment

We assessed the impact of "policy and legal risks" and "technological risks" within the transition risks based on the IEA *World Energy Outlook 2024*, national climate strategies and policies, local climate-related regulations at operational sites, and the Group's strategic planning and current situation. According to the scenario analysis results, under the Stated Policies Scenario (STEPS), the extent of losses due to transition risks is relatively low. Under the Net-Zero Emissions by 2050 Scenario (NZE), the Group needs to closely monitor potential cost increases associated with carbon pricing mechanisms and the adoption of low-carbon technologies.

4.2.3 Risk Management

To address climate-related risks and opportunities, Kingdee International has integrated climate-related risk management into the Group's overall risk management system¹² and established a systematic climate-related risk management process. The Strategy and Sustainable Development Committee, with the support of management, regularly identifies, assesses, and manages climate-related risks and opportunities. It collaborates with relevant departments to develop response plans and reports to the Board of Directors regularly.

Climate-related risk management is aligned with the Group's overall risk management process and includes four steps: identification, assessment, response, and monitoring/reporting:

Climate Risk Identification: Based on external climate-related policies and industry development trends, and through stakeholder communication, peer benchmarking, and market research, combined with our current operational status, we identify climate-related risks and opportunities that may affect Kingdee and establish a preliminary list of climate-related risks and opportunities.

Climate Risk Assessment: From the dimensions of "likelihood" and "financial impact on the Group", covering short-, medium-, and long-term timeframes, we conduct scenario analysis and evaluation of each climate-related risk and opportunities to determine the potential impacts and priorities under different scenarios and identifying material climate-related risks and opportunities.

Response to Climate Risk: Based on the assessment results, the Environmental and Climate Change Task Force collaborates with relevant departments to develop and implement risk response plans.

Climate Risk Monitoring and Reporting: The Environmental and Climate Change Task Force continuously tracks the management of climate-related risks and opportunities and dynamically adjusts strategies as needed. The Task Force reports to the Strategy and Sustainable Development Committee of the Board of Directors every six months on matters including the management status and progress of climate-related goals. The Strategy and Sustainable Development Committee reports annually to the Board of Directors on the progress of the climate-related strategy and targets.

4.6 綠色建築

Green Building

金蝶國際積極回應國家「雙碳」戰略，新總部大樓「金蝶雲大廈」自設計之初便融入科技、高效、綠色、健康、共享的理念，通過使用綠色環保建材、引入節能技術與產品、提升資源利用效率等舉措，最小化建造和運營過程中對周圍環境的影響，著力打造生態友好的辦公環境。目前「金蝶雲大廈」已獲得LEED鉑金預認證和中國綠建三星級認證。

Kingdee International actively supports the national “carbon peaking and carbon neutrality” strategy. From its initial design, our new headquarters building—“Kingdee Cloud Building”—integrated the principles of technology, efficiency, green, health, and sharing. By using eco-friendly materials, energy-saving technologies and products, and resource-efficiency practices, we minimized the environmental impact throughout the construction and operation stages to create an eco-friendly office environment. “Kingdee Cloud Building” has received LEED Platinum Pre-certification and China Green Building Three Star Certification.

綠色設計 Green Design

節能生態幕牆：「金蝶雲大廈」的53,451m²外立面幕牆均採用三銀LOW-E中空玻璃，可見光透射率高達約95%結合大廈定制「K」字穿孔圖案，有效降低建築表面反光率，符合鳥類的視覺習慣，防止鳥類撞牆并減少城市光污染。此外，幕牆系統具備優異的紫外線阻隔、隔熱和降噪性能，并配合內開式窗戶形成自然風道，即使在關閉中央空調的情況下，也能讓深圳灣的清新海風和大沙河綠地的自然風順暢流入，形成「會呼吸的建築」。實測顯示，自然新風量可達31m³/小時/人，且富含森林級負氧離子，顯著提升室內空氣質量。持續引入自然風，有助於減少「空調病」，提升員工舒適度和工作效率。整體設計兼顧生態保護、節能降耗與室內健康環境，契合深圳高溫高濕氣候特點，全面提升建築的運行效能和使用體驗。

Energy-Saving Ecological Curtain Wall: The Kingdee Cloud Building's entire 53,451 m² exterior curtain wall uses triple-silver LOW-E insulated glass with a visible light transmittance of approximately 95%. The Customized "K" shaped perforated pattern reduces surface reflectivity, aligning with bird vision to prevent collisions and minimize urban light pollution. The curtain wall system also features excellent UV blocking, thermal insulation, and soundproofing. Combined with inward-opening windows, it creates a natural ventilation path, allowing fresh sea breezes from Shenzhen Bay and natural wind from the Dasha River greenway to enter even without central air conditioning, creating a "breathing building". Tests show that the natural ventilation rate reaches 31 m³/hour/person and, enriched with negative oxygen ions, significantly improving air quality. Continuous fresh air introduction reduces the risk of "air conditioning syndrome", enhancing employee comfort and productivity. The overall design balances ecological protection, energy conservation, and indoor health, optimized for Shenzhen's hot and humid climate, greatly improving building performance and user experience.

節能電梯系統：電梯系統配置20部瑞士Schindler品牌進口高速電梯，均採用無接觸式扶梯技術，最長候梯時間約為27.5秒，在高峰期可實現候梯時間節省約30%。

Energy-Efficient Elevator System: The building is equipped with 20 imported high-speed elevators from Schindler (Switzerland), using contactless technology. The longest waiting time is about 27.5 seconds, with a 30% reduction in wait time during peak hours.

節能空調系統：大廈配置了智能化克萊門特磁懸浮空調系統，實現了粗效和中效過濾以及靜電空氣淨化功能。在啟用ECO模式下，潛在的節能率可達29%，綜合能效超過了廣東省一級標準。

Energy-Saving Air Conditioning System: The building is equipped with intelligent CLIMAVENETA magnetic suspension chillers, offering coarse and medium filtration and electrostatic purification. Under ECO mode, potential energy savings reach 29%, exceeding Guangdong's top-tier efficiency standard.

照明節能策略：在公共區域，照明系統實施分區控制、定時控制以及感應控制等節能措施；同時，確保採光區域的照明控制與其他區域的照明控制相互獨立。

Lighting Energy Strategies: In public areas, lighting systems are controlled by zoning, timers, and motion sensors. Lighting in well-lit areas operates independently from other zones.

智慧資源管理：通過物聯網(IoT)平臺實現樓宇智能化的能源與水資源管理，實時監控。

Smart Resource Management: An IoT platform enables smart management of building energy and water resources, with real-time monitoring.

空中花園：「金蝶雲大廈」使用4層挑高空間，建立了一座面積達2,000m²的開放式垂直生態花園——金蝶公園，巧妙調節建築溫度之餘，為辦公場域引入生態活力。

Sky Garden: A 2,000 m² open vertical ecological garden—Kingdee Park—is built within four-story high open spaces. It regulates building temperature and injects ecological vitality into the office environment.

綠色施工 Green Construction

嚴格處置排放與廢棄物：依據主管機關的規定及地方環境保護標準，對建設過程中產生的噪音、廢水、廢氣及固體廢棄物的產生及其處理實施嚴格的要求與管理。

Strict Emission and Waste Management: We strictly followed regulatory and local environmental standards to manage noise, wastewater, air emissions, and solid waste during construction.

生態保育：在施工過程中實施有效策略，以預防水土流失，避免對自然環境造成破壞和污染；施工結束後，迅速恢復健全的自然生態系統。

Ecological Protection: Measures were taken during construction to prevent soil erosion and avoid environmental damage and pollution. Post-construction, the natural ecosystem was quickly restored.

雜訊控制策略：在大型建築施工過程中，針對所有發聲設備實施雜訊遮罩設計，安裝相應的消聲、隔音以及減振設施。

Noise Control Measures: For all noise-generating equipment, we applied noise-masking designs and installed soundproofing, silencing, and vibration isolation equipment during construction.
