3.3 商業行為準則

金蝶高度重視企業內部的職業道德與廉潔建設，營造誠實守信的企業氛圍，積極建立監督機制，定時開展自查行動，並注重廉潔風氣的培養，營造健康管理模式。

在公司業務有重大變更，或審計發現新的問題點時，我們會審視內部的商業道德相關制度，並做必要的更新，以確保商業道德管理體系的有效性。2021年，公司完善修訂了《金蝶紀律處分條例》，整體調整紀律處分條例框架，重點突出底線行為和違紀行為，完善整體框架，完善原有處分體系，增設損失賠償，結合其他激勵體系，形成違紀處分閉環管理。將原有的三大底線行為擴展為十大底

into ten bottom-line behaviors, further strengthened the cultivation of the bottom-line thinking of all employees, and further standardized the business ethics behavior for compliant enterprise operation.

The Company's management attaches particular importance to risk control and anti-corruption management, and has clearly defined that the CEO's office meeting is the top decision-making level for risk control and anti-corruption management and the Internal Control and Audit Department takes the lead in carrying out the risk control and anti-corruption management, and meanwhile has led the construction of management structure of the Company's core business ethics. We have established regular proactive reporting and filing mechanism, conduct special audit inspections for key risky businesses every year to prevent irregularities and frauds from occurring by taking dual measures of active audit inspection and passive information collection. Based on internal audit inspections, the Audit Department reports annually to the CEO's office meeting on the status of the Company's risk control and the investigation and handling of irregularities and fraud, and continuously supervises the responsible departments to rectify risk problems.

線行為，進一步加強全員底線思維建設，進一步規範企業合規經營的商業道德行為。

公司管理層尤其重視風險管控與反腐敗管理工作，內部明確了以 CEO 辦公會作為風控和反腐敗管理工作的最高決策層，內控與審計部牽頭主導風控管理和反腐敗工作的開展，同時主導構建了公司核心商業道德的管理架構。我們建立了常態化的主動報備機制，每年針對重點風險業務開展專項審計檢查，以主動審計檢查加被動信息收集的雙重並舉措施防範違規、舞弊行為的發生。基於內部審計檢查，審計部每年向 CEO 辦公會匯報公司風險管控狀況及違規舞弊查處情況，並持續督促責任部門對風險問題進行整改。

Standardize the reporting and handling process of bribery incidents

Kingdee strengthens the investigation and punishment of internal violations. For violations that harm the interests of Kingdee, the offending employees will be warned, dismissed or subject to other punishments according to the national regulations *Criminal Law of the People's Republic of China* and the *Company's Kingdee Code of Business Conduct, Labor Contract, Kingdee Disciplinary Regulations* and other related management systems.

3.3.1 反貪腐管理

為了夯實金蝶反腐敗管理體系，公司在企業內部開展了一次全面的合規與廉政自檢、自查，及時發現問題、督促整改糾正，有效預防違規及腐敗行為的發生。

For dealing with reported incidents, Kingdee has a well-established process for handling them.

對於處理舉報事件，金蝶有一套完善的處理流程：

The Company authorizes the Audit Department as the sole department in charge of investigating irregularities and frauds, and this department directly reports to the CEO of the Company, which ensures the independence and objectivity of reporting acceptance and investigation from the perspective of the governance structure. The Company also encourages any informed person to report to the Company on any discovered violation of rules or regulations; such reports can be real-name reports or anonymous reports; for real-name reports, the Company will reply to the whistleblower with 24 hours regarding the acceptance; for anonymous reports, the Company will reply to the whistleblower within 3 working days regarding the acceptance. The Company treats whistleblowers and reporting clues with strict confidentiality procedures, strictly prohibits the leakage of reporting information and whistleblower information, and strictly punishes those who threaten or retaliate against whistleblowers; in serious cases, the threatening or retaliating person will be handed over to the police; this effectively protects whistleblowers.

In addition, we set up a special bonus to reward whistleblowers. If a report is verified and recovers economic losses for the Company, then the Company will, according to the nature of the incident, the impact degree and the whistleblower's cooperation, give the whistleblower material rewards or other rewards. So far, the Company has issued the above-mentioned reward for a number of verified reports.

公司授權審計部為唯一從事違規違紀、舞弊行為調查的專職部門，直接向公司CEO匯報，從治理結構上保障了舉報受理和調查工作的獨立性與客觀性。公司鼓勵任何知情人員向公司舉報發現的違紀、違規行為，接受實名舉報及匿名舉報方式，對於實名舉報，公司在24小時之內向舉報人答覆受理情況；對於匿名舉報，公司在3個工作日內向舉報人答覆受理情況。公司對舉報人和舉報線索設有嚴格保密程序，嚴禁對舉報信息及舉報人信息的洩漏，對威脅、報復舉報人的行為予以嚴懲，性質嚴重者移送公安機關處理，切實保護舉報人。

此外，我們設置專項舉報獎勵金，對於經查實並為公司挽回經濟損失的舉報事件，根據事件的性質、影響程度及舉報者配合情況，對舉報者給予物質獎勵或其他獎勵。目前公司已對多起已查實舉報發放上述獎勵。

After establishing an investigation into the incident, the executive investigation team will lead the execution of data inspection, personnel interviews and other investigation procedures, coordinate with the Company's legal department, information security department and other support when necessary, and after obtaining relevant evidence of fraud, communicate with the personnel involved to confirm the facts of fraud.

在對事件進行立項調查後，由執行調查小組主導執行數據檢查、人員訪談等調查程序，在必要時協調公司法律部門、信息安全部門等支持，取得相關舞弊證據後，與涉事人員溝通確認舞弊事實。

After the investigation of the incident is completed, the Company issues an investigation report and prepares handling opinions according to the *Kingdee Disciplinary Regulations* and other system regulations, which are approved by the group management. The business management department corresponding to the fraudulent personnel is responsible for implementing the handling decision, and the Audit Department will also continuously monitor the implementation of the handling decision.

我們在事件調查結束後出具調查報告，並根據《金蝶紀律處分條例》及其他制度規定擬定處理意見，並經由集團管理層審批。舞弊人員對應的業務管理部門負責執行處理決定，審計部也將持續監督處理決定的執行。

In order to ensure fairness and impartiality, relevant personnel who have objections can appeal to the Human Resources Department or the Kingdee Employee Committee regarding the Company's punishment decision, etc. After the investigation of the incident is completed, we will make a formal public announcement of the results of the treatment, which will serve as a warning to the whole group while enhancing the transparency of the handling of the incident. In 2021, we built a comprehensive internal case information management system, which effectively improves the efficiency of case processing and management and facilitates audit work through the measures of information-based case processes and data-based case information.

In 2021, the Company maintained a tough stance on corruption, and there was no corruption lawsuit because corruption was nipped in the bud resolutely. Meanwhile, we strengthened internal discipline inspection, investigated, and punished 55 employees for violating our internal regulations or committing fraud, and severely cracked down on serious violations involving horizontal competition, violations of financial regulations, encroachment on trade secrets, etc. In this way, we defended Kingdee's anti-corruption principles.

Strengthen supplier integrity management

The Company attaches great importance to the integrity management of suppliers. We require employees to strictly abide by procurement management requirements in conducting procurement activities, and we punish the behavior that violates the Company's procurement management system and causes losses or negative impacts to the Company according to relevant systems and disciplinary regulations. In addition, we require the procurement department to review supplier qualifications and conduct on-site inspections, and we also require all suppliers to sign integrity statements and to re-sign integrity statements after the renewal of cooperation agreements. The Audit Department also reviews supplier agreements on a sample basis during regular audit projects to ensure that the integrity statement signing rate reaches 100%.

為確保公平公正，相關人員如有異議，可以就公司處罰決定等向人力資源部或金蝶員工委員會申訴。事件調查結束後，我們將處理結果進行正式發文公示，在全集團範圍內起到警示作用的同時，提升事件處理透明度。2021年，我們構建了全面的內部案件信息化管理系統，通過信息化案件流程、數據化案件資料的舉措，有效提升案件處理及管理效率，有效幫助審計工作的開展。

2021年，公司持續保持了反腐敗的高壓態勢，未發生貪腐訴訟案件，堅決把貪腐扼殺在意識萌芽階段。同時，我們也加強了內部的紀律檢查，共查處內部違規舞弊員工55人，嚴肅處理同業競爭、財經違紀、侵犯商業秘密等嚴重違紀行為，守護金蝶底線。

加強供應商廉潔管理

公司十分重視供應商的廉潔管理，我們要求員工嚴格遵守採購管理要求開展採購活動，對違反公司採購管理制度並給公司造成損失或影響的行為，依據相關制度及紀律處分條例進行處罰。我們要求採購部門對供應商資質進行審核及開展現場考察，要求全部供應商簽署廉潔聲明，並在合作協議更新後複簽廉潔聲明。審計部在常規審計項目中也會抽樣複查供應商協議，保障廉潔聲明簽署率達到100%。

Customer Centricity

以客戶為中心

Kingdee continues to explore technological innovation, bring quality products and services to customers, and promote social and economic development.

金蝶持續探索技術創新，為客戶帶來優質產品及服務，推動社會經濟發展。

4.I Technology Innovation

Kingdee carries forward the cultural legacy of technological innovation and increases the investment in scientific and technological R&D. It has made some breakthrough in technical fields of SaaS connectors, block chain and 5G etc.

SaaS connector

SaaS model is an integral part of Kingdee's services. Kingdee provides various SaaS cloud services according to enterprise size (large, small, and micro enterprises) and growth rate, including financial cloud, supply chain cloud, s-HR cloud, collaborative office cloud, etc. Kingdee is committed to the research of SaaS connector, with an aim to establish a connection channel between internal and external products, and solve the problem of SaaS data island that has long troubled the industry and users. In June 2021, Kingdee took the lead in joining DingTalk SaaS Connector, and established the "Industry Finance Alliance" with 8 other institutions and enterprises including China Business Accounting Institute.

For the research of large-scale construction of SaaS connector, Kingdee is exploring the cloud-based SaaS service configuration platform, namely Kingdee Link, in an effort to create a tool that configures enterprise SaaS services without code to solve the problems in enterprise cross-platform business integration and cross-business service collaboration. The platform adopts the enterprise service integration framework independently developed by Kingdee to complete the automatic docking with third-party SaaS services, and completes the process of data interaction and sharing based on the Cloud Information Model (CIM+) by extended international standard to address the pain points of enterprise data integration. The platform supports simple manual configuration to complete the collaboration of multiple enterprise services, and supports the extension and sharing of business data models. For example, by integrating Kingdee's proprietary cloud services and third-party cloud services, we can provide lightweight SaaS application interconnection services for many corporate customers, reduce the difficulty of development, realize the automation of cross-industry business processes, connect the global data, unify user applications and streamline business processes. We have completed the synchronization operation of business data about sales orders, customers, etc., realized the early warning of commodity inventory and automatic reminder of overdue warehousing, linked third-party services such as online documents, e-commerce, collaborative office and email communication, and provided intelligent recommendation of value-added information such as analysis broadcasting and data prediction.

5G

5G

The Kingdee Research Institute follows the development trend of new technologies in the 5G era and proposes a combined solution framework based on 5G messaging middleware and cloud-based SaaS, which is an important window to realize the "interconnection of all services" for enterprise management. Our proprietary "5G messaging middleware" with independent intellectual property rights can help enterprise clients quickly build various types of 5G messaging Chatbot light applications. Currently, several demonstration applications such as "Kingdee Cloud Galaxy", "Kingdee Cloud Client Service" and "Kingdee 5G Messaging" have been developed. For example, "Kingdee Cloud Galaxy" light application is connected with SaaS services such as financial cloud, mobile office cloud and smart operation in the background. Authorized staff of an enterprise can interact with each other through text, voice, fixed menus, card buttons and other forms on the native 5G messaging interface of the mobile phone to complete sales, procurement, funds, reports, approval and other frequent business processing affairs safely, efficiently and conveniently, which effectively improves the operation efficiency of the enterprise management process. In collaboration with China Mobile, Kingdee Cloud Galaxy 5G messaging Chatbot light application was officially launched and released in July 2021.

金蝶研究院緊跟 5G 時代新技術發展動向，提出基於 5G 消息中間件和雲化 SaaS 組合解決方案框架，是實現企業管理「萬務互聯」的重要視窗。擁有自主知識產權的「5G 消息中介軟件」可以幫助企業客戶快速構建各種類型的 5G 消息 Chatbot 輕應用，目前「金蝶雲·星空」、「金蝶雲客服」、「金蝶 5G 消息」等多個示範應用已完成開發。以「金蝶雲·星空」輕應用為例，其與後台的財務雲、移動辦公雲和智慧經營等 SaaS 服務對接，企業授權的工作人員可以在手機原生的 5G 消息介面中通過文字、語音、固定功能表、卡片按鈕等多種形式交互，安全、高效、便捷的完成銷售、採購、資金、報表、審批等多種高頻業務處理，有效提高企業管理流程的運轉效率。攜手中國移動，金蝶雲·星空 5G 消息 Chatbot 輕應用已於 2021 年 7 月正式上線運行並對外發佈。

Six cases were adjudicated in the first instance, with a compensation amount of RMB4.02 million.

Online 線上

We cooperate with third-party sales platforms to monitor and compare online product prices to identify suspicious sellers, while ensuring compliance of online agents through self-management and establishing agent whitelists. The defendant company maliciously registered Kingdee trademarks, launched malicious complaints on e-commerce platforms with the registered trademarks, and illegally used the Chinese and English versions of "Kingdee" trademarks to carry out advertising, thus infringing Kingdee's intellectual property rights and disrupting the market order. Considering the company's bad behavior of infringement on trademark rights and unfair competition, Kingdee resorted to laws and made the infringer pay a heavy price for its behavior.

被告公司惡意搶注金蝶商標，並利用搶注的商標在電商平台發起惡意投訴，違法使用「金蝶」及「Kingdee」商標開展廣告宣傳，侵犯金蝶知識產權，擾亂市場秩序。對於該公司侵害商標權和不正當競爭的惡劣行為，金蝶訴諸法律，讓侵權者為其行為付出沉重代價。

Three key points in the annual insight of C50+ for 2021 based on the selection and research for the above mentioned awards: innovation, ecosystem, digital. Innovation has the attribute of long-termism; ecosystem has the concept of value symbiosis, and digital is the so-called digital transformation. The insight itself has the viewpoint of long-termism and value symbiosis.

中國數字化突破實踐獎是近兩年新設獎項，該獎項希望發掘出在數字化轉型方面具有突出成就的企業管理實踐，推動企業數字化管理創新進程，發掘其中的研究價值和借鑒價值。2021年，物美科技集團有限公司、伽藍（集團）股份有限公司、上海第一財經傳媒有限公司等憑藉針對數字化領域具有創新突破的管理實踐獲得中國數字化突破實踐獎。

基於上述獎項的遴選調研，C50+的2021年年度洞察三大要點：創新、生態、數字。創新具有長期主義的屬性，生態具有價值共生的理念，數字就是所謂數字化的轉型，本身便具有長期主義和價值共生的觀點。

「長期主義 價值共生」的新洞見

New insights into "long-termism and value symbiosis"

企業價值鏈的所有環節，都值得用數字化思維和工具重新梳理一遍。

All aspects of the enterprise value chain are worth being re-analyzed with digital thinking and tools.

「創新」具有「長期主義」屬性，是企業家的特質，也是企業生存與增長的來源。
"Innovation" has the attribute of "long-termism", which is the characteristic of entrepreneurs and the source of enterprise survival and growth.

「生態」是「價值共生」應有之義，即在動態和穩定當中找平衡，就需要在組織內外部和企業上下游建立夥伴關係，形成共識和交流的平台。

"Ecosystem" is the inherent meaning of "value symbiosis", that is, to strike a balance between dynamics and stability, for which it is required to establish partnerships inside and outside the organization and upstream and downstream of the enterprise, and create a platform for consensus and communication.

「數字」即數字化轉型，基於「長期主義」屬性的企業「創新」，以及體現「價值共生」的企業「生態」，都需要通過「數字」來賦能實現。
"Digital" means digital transformation. The enterprise "innovation" based on the "long-termism" attribute and the enterprise "ecosystem" reflecting the "value symbiosis" are enabled by "digital" means.

Notes:

The environmental data for the year 2021 covers emissions, resource consumption and carbon emissions generated within the scope of Kingdee's business, and does not include environmental data from other companies or enterprises in the leased portion of the software park.

Carbon emissions refer only to carbon dioxide emissions and do not include the types of greenhouse gases such as methane and nitrous oxide emitted by other emission sources.

Based on the content of Kingdee International's business, emissions from its operations, including emissions of nitrogen oxides, sulfur oxides and other pollutants regulated by national laws and regulations, are insignificant.

According to the ISO 14064 greenhouse gas auditing standard, direct greenhouse gas emissions (Scope 1) are from sources directly owned and controlled by the organization, such as greenhouse gas emissions from its own transportation; indirect greenhouse gas emissions (Scope 2) are from indirect sources of energy, such as greenhouse gas emissions from purchased electricity.

According to the Guide (Trial) to Accounting and Reporting Methods for Enterprise Greenhouse Gas Emission in Other Industries, the carbon dioxide is accounted, in which the factor of emission from outsourced electricity is based on the Benchmark Emission Factor of Regional Grids in China published by South Regional Grid on a yearly basis.

註：

2021年度全年環境數據涵蓋金蝶業務範圍內所產生的排放物、資源消耗和碳排放量，不包含軟件園其他公司或企業外租部分的環境數據。

碳排放量僅指二氧化碳排放量，不包含其他排放源所排放的甲烷、氧化亞氮等溫室氣體類型。

基於金蝶國際的業務內容，其在運作過程中所產生的廢氣排放，包括氮氧化物、硫氧化物及其他受國家法律及規例規管的污染物排放並不顯著。

根據ISO 14064溫室氣體審計標準，直接溫室氣體排放（範疇一）針對直接來自於組織所擁有及控制的排放源，如自身所擁有的交通工具的額排放；間接溫室氣體排放（範疇二）針對能源間接排放源，如外購電力而造成的溫室氣體排放。

根據國家發改委的《工業其他行業企業溫室氣體排放核算方法及報告方法指南（試行）》對二氧化碳進行核算，其中外購電力排放因數採用南方區域電網基於每年發佈的《中國區域電網基準線排放因數》）。
