No. 1 in a row! Kingdee wins the Gartner's High Productivity aPaaS market in China

[13 May 2022, Hong Kong] Recently, Gartner, an authoritative international advisory firm, released the report "Market Share: All Software Markets, Worldwide, 2021", which pointed out that in the field of High Productivity aPaaS (High Productivity aPaaS), Kingdee overwhelmed Microsoft, Mendix, Oracle and many other foreign companies to win the No. 1 market share in China, accounting for 23.84% and ranking fourth in the whole Asia Pacific region, being the most forward-ranked Chinese cloud service provider in the Asia Pacific region and the only one in the top five in China. Kingdee has once again reported satisfactory result to the outside world with the Performance of "the No. 1 market share" for its cloud platform.

According to the report, the Kingdee Cloud Cosmic ranked first in the Chinese market share of high productivity aPaaS with a market share figure of 23.84%, which is an

important achievement of Kingdee 's deep insight into the nature of Chinese enterprise management over the years, and also illustrates the rise of Chinese software companies from another perspective.

In recent years, with the development trend of digital cloud, the traditional ERP system is aging, and the new EBC digital ecosystem (Enterprise Business Capability) was born as a response to the development of enterprises in the digital era. Compared with ERP, EBC places more emphasis on business capabilities, helping enterprises to shift their focus from internal management to the entire industry chain ecology, and from process-driven to digital-driven. In the future, all enterprises should become assembly enterprises. More and more enterprises will support business innovation and management reconstruction by building assembly EBC to create resilient enterprises. With the gradual improvement of the product technology capability and the increasing improvement of the industry chain of the information technology application innovation of domestic companies represented by Kingdee, domestic companies have gradually become a better choice than overseas companies.

With Kingdee's nearly three decades of experience in enterprise services and accumulation in business capabilities, the Kingdee Cloud Cosmic platform has become the best practice for EBC implementation in the Chinese enterprise market. The assembly enterprise PaaS platform, built on a new generation of enterprise IT architecture represented by cloud-native , distributed, middle-office, organically integrates and assembles innovative technologies such as low code, Integrated weaving, Data intelligence, security and trust with Kingdee's years of enterprise service accumulation, helping enterprises to quickly build digital technology capabilities with stable performance, high resilience, strong adaptability, and independent control, providing enterprises with multi-scenario, multi-level and new mode of digital support, and accelerating enterprises to realize digital innovation and reform.

Since its launch, Kingdee Cloud Cosmic has been tested by more than 500 large and multinational enterprises, and has also been recognized and verified by large enterprises in terms of stability, high reliability and the construction of modern enterprise IT architecture. China Merchants Group, Huawei, Huaneng Group, WZ Group, Shagang Group, Yunnan Tobacco, HMNTech and other large enterprises that have been among

the top 500 for many years have completed the reconstruction, transformation and upgrading of many core business platforms under the support of Kingdee Cloud Cosmic.

It is reported that in addition to the Gartner report, according to IDC's recent report, the Insight into the Cloud Service Market of China's ERP Application Platform, Kingdee Cloud Cosmic ranked first in the public cloud market of application cloud platform, with a market share of 21.93%.

After 29 years of development, Kingdee has accumulated strong technical strength and has comparable international technical standards; helped more than 6.8 million enterprises build a new generation of enterprise business capabilities, continuously enabled the construction of "Digital China", and jointly advocated with Gartner and other institutions and enterprises to put forward the fourth generation of enterprise management reform after ERP - EBC (Enterprise Business Capabilities). In the future, Kingdee will continue to help enterprises build independent and controllable business innovation and digital management platform capabilities, join hands with more enterprises to build world-class enterprises, realize "digital governance enterprises, resilient growth", and make Chinese software rise in the world.
